

Poliform

ARCHITECTURAL

Poliform

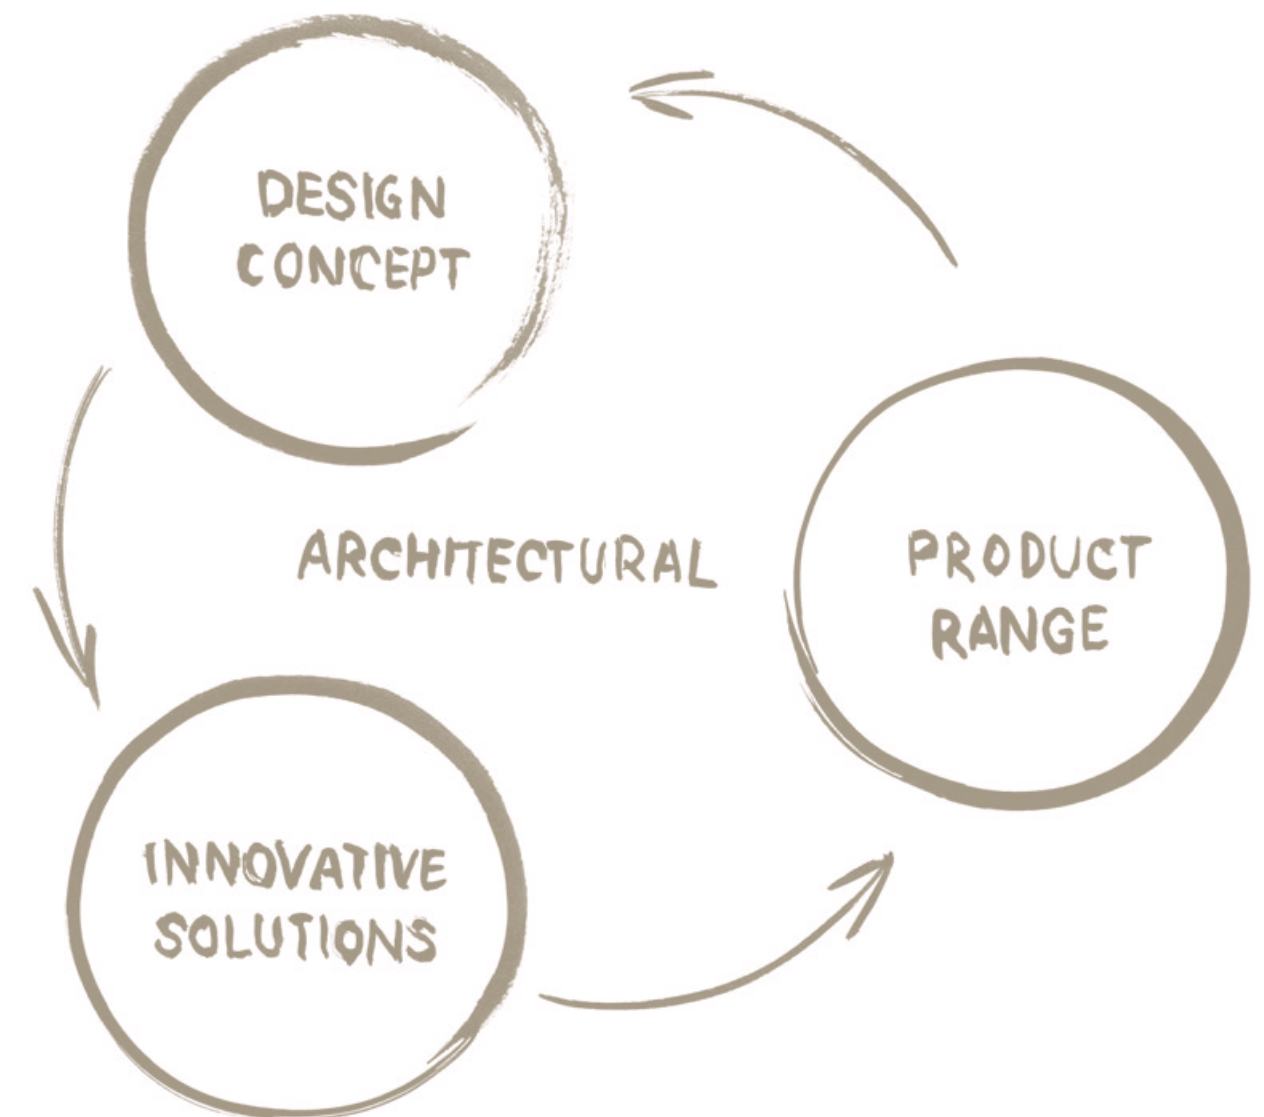

Poliform presenta Architectural, un progetto che ha l'ambizioso obiettivo di portare l'interior design a un altro livello. Le proposte di Architectural si rivolgono a un mercato evoluto, pronto a leggere l'ambiente domestico come uno spazio fluido dove sistemi e arredi, perfettamente integrati, danno vita a un'architettura totale.

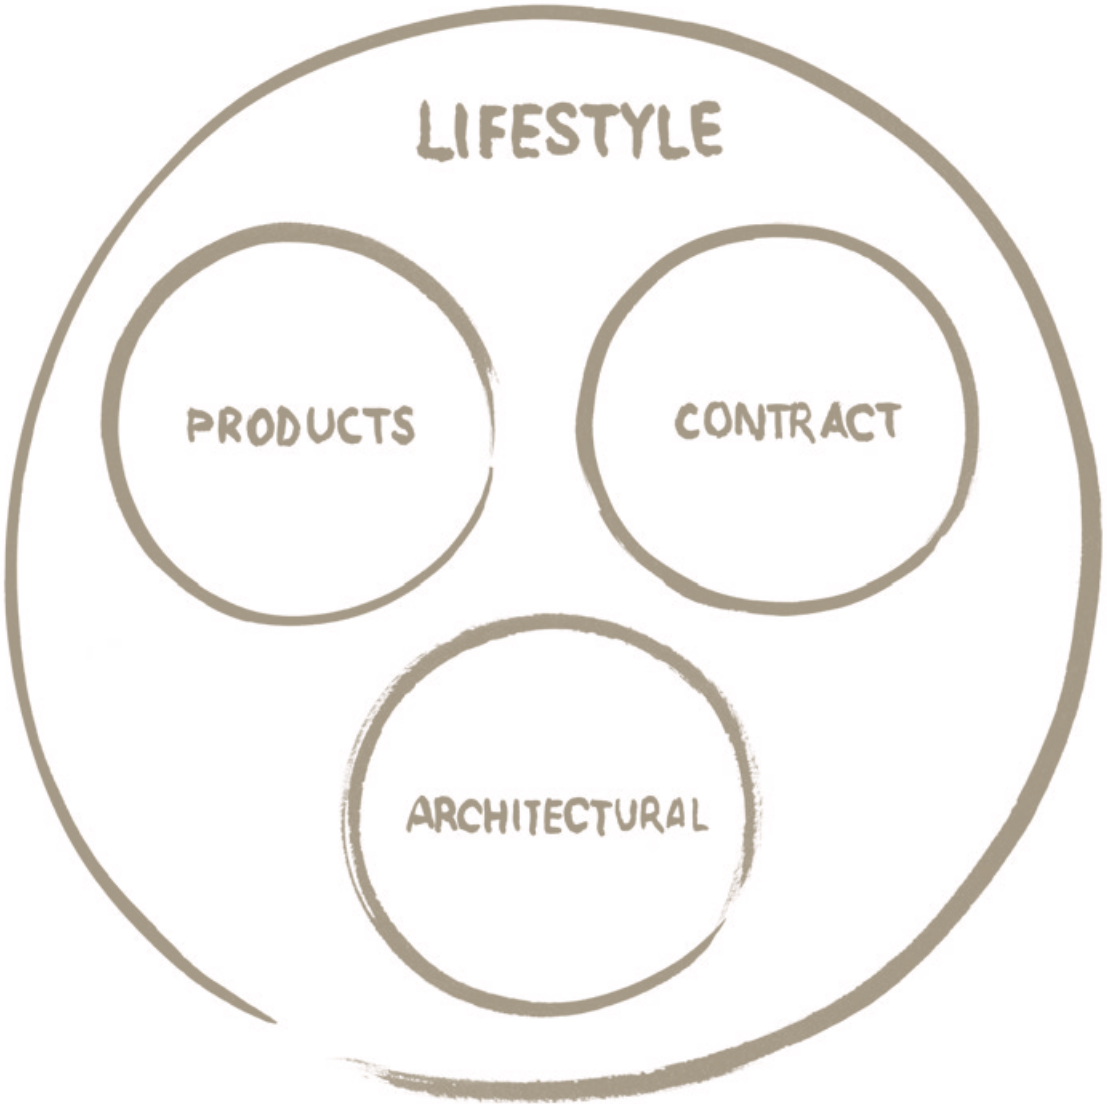

Poliform presents Architectural, a project that has the ambitious goal of taking interior design to another level. Architectural's proposals are aimed at an advanced market, ready to interpret the domestic environment as a fluid space where systems and furnishings, perfectly integrated, give life to a total architecture.

Architectural definisce un impegno preciso nel rapporto con il mondo della progettazione di interni, nell'ottica di un'architettura totale. Al servizio di architetti e interior designer, è un concept nato per offrire una libertà progettuale senza precedenti, un sistema di elementi con cui creare soluzioni innovative.

Architectural defines a clear commitment to the world of interior design, with a focus on total architecture.

At the service of architects and interior designers, it is a concept created to offer unprecedented design freedom, a system of elements with which to create innovative solutions.

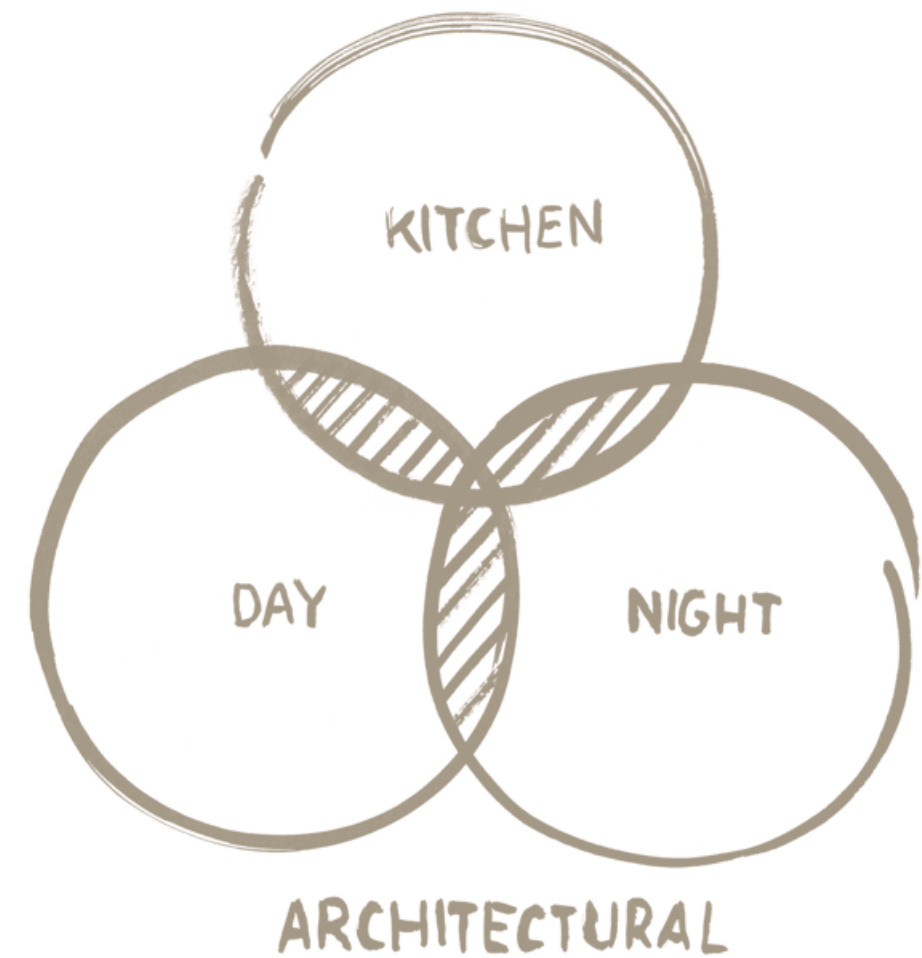

Nato da anni di confronti con i migliori architetti internazionali, e dall'analisi costante di Poliform Lab sulle tendenze dell'abitare contemporaneo, Architectural unisce la qualità delle collezioni di arredi a quella delle realizzazioni su misura, esprimendo pienamente la dimensione lifestyle del brand.

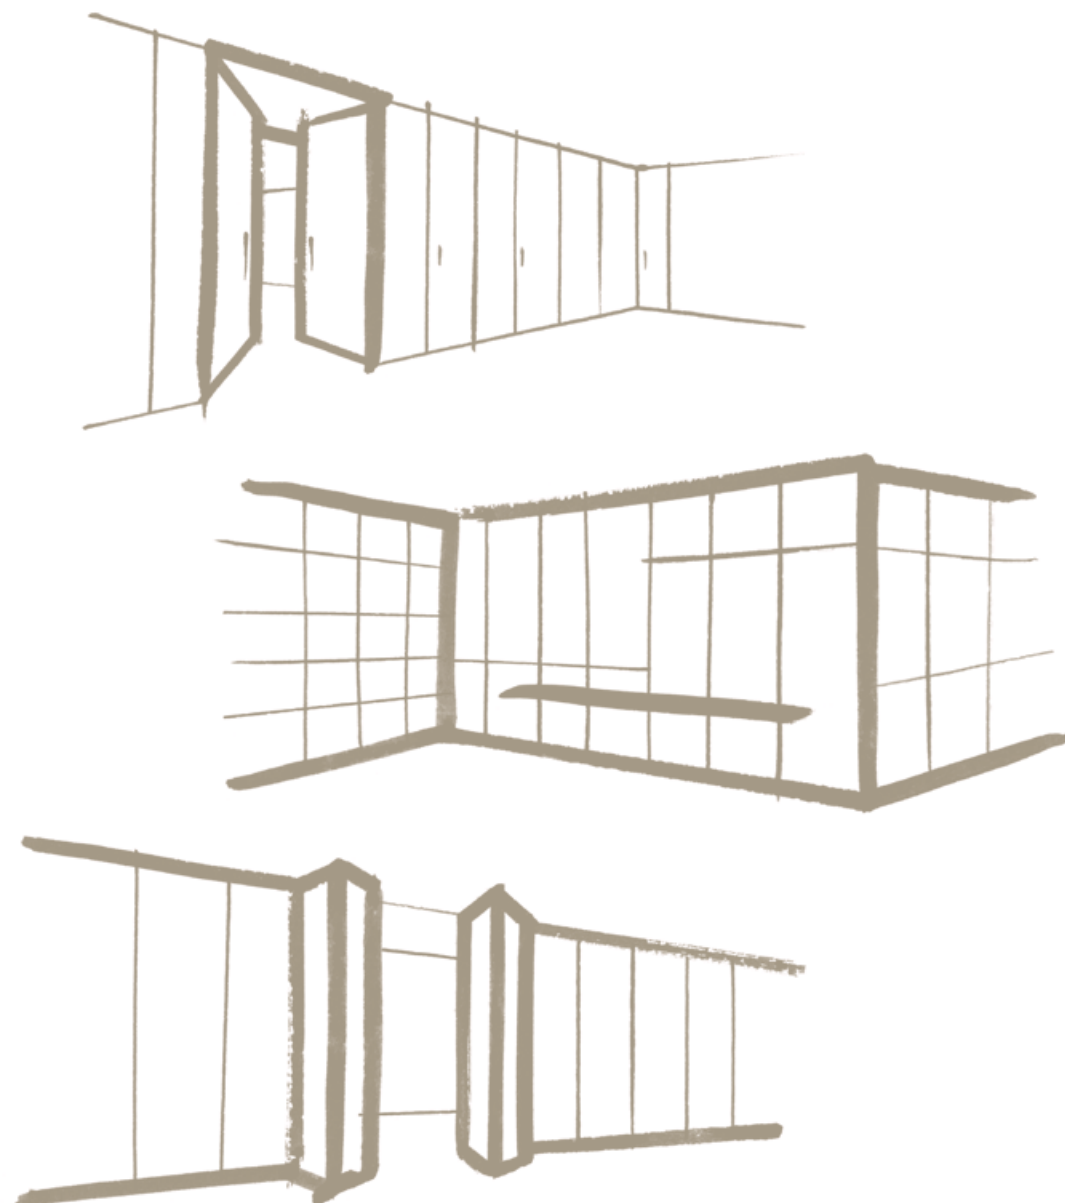

The result of years of discussions with top international architects and Poliform Lab's constant analysis of contemporary living trends, Architectural combines the quality of the furniture collections with that of made-to-measure creations, fully expressing the lifestyle dimension of the brand.

La configurazione dell'ambiente domestico è interpretata alla luce di un'architettura flessibile e leggera in cui i sistemi non solo si integrano completamente, ma creano nuovi spazi.

Architectural rappresenta l'anello di congiunzione delle collezioni Night System, Day System e Kitchen.

The configuration of the domestic environment is interpreted in the light of a flexible and lightweight architecture in which the systems not only integrate completely, but also create new spaces. Architectural is the link between the Night System, Day System and Kitchen collections.

Con gli elementi di Architectural – aperture, boiserie e pannelli interparete – si mettono a punto progetti completi, dove la continuità estetica tra gli ambienti è talmente perfetta da avvicinarsi a una realizzazione artigianale. Precisione tecnica e performance di alto livello sono assicurate dalla produzione industriale.

With the elements of Architectural – openings, panelling and dividing wall panels – complete projects are developed, where the aesthetic continuity between the rooms is so perfect that it comes close to handcrafted.

Technical precision and high-level performance are ensured by industrial production.

Il talento di Poliform è il saper fare, una capacità che unisce cultura e conoscenza e che, prima di essere un gesto, è un’idea di progettazione. Con Architectural, Poliform transcende la dimensione dell’arredamento per creare architetture leggere e flessibili che rispondono alle esigenze più attuali dell’abitare.

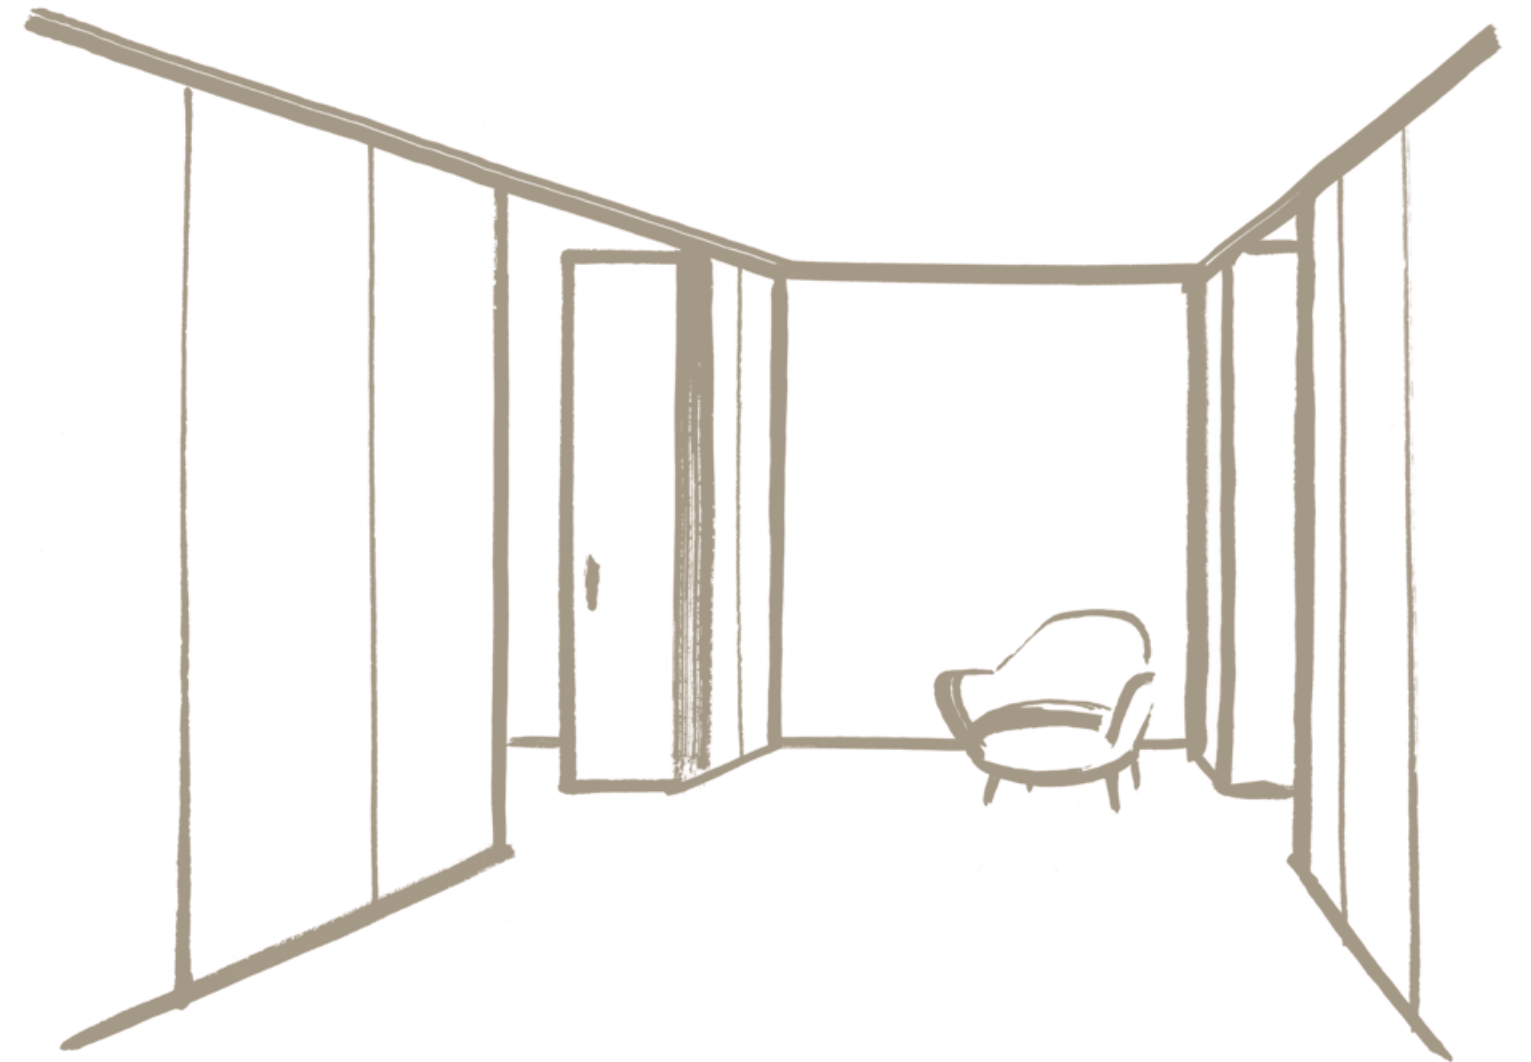

Poliform’s talent is know-how, a skill that combines culture and knowledge and which, before being a concept, is a design idea. With Architectural, Poliform transcends the dimension of furniture to create lightweight, flexible architecture that responds to the latest living requirements.

Lo spazio domestico è fatto di connessioni. Connessioni tra gli ambienti, tra gli oggetti e lo spazio, tra le persone.

Per collegare gli ambienti in modo funzionale ci sono le porte pivotanti, dove finiture e maniglie sono identiche a quelle degli armadi, per un'uniformità estetica totale.

The domestic space is composed of connections.

Connections between environments, between objects and space, between people. To connect the rooms in a functional way, there are pivoting doors, where finishes and handles are identical to those of the wardrobes, for total aesthetic uniformity.

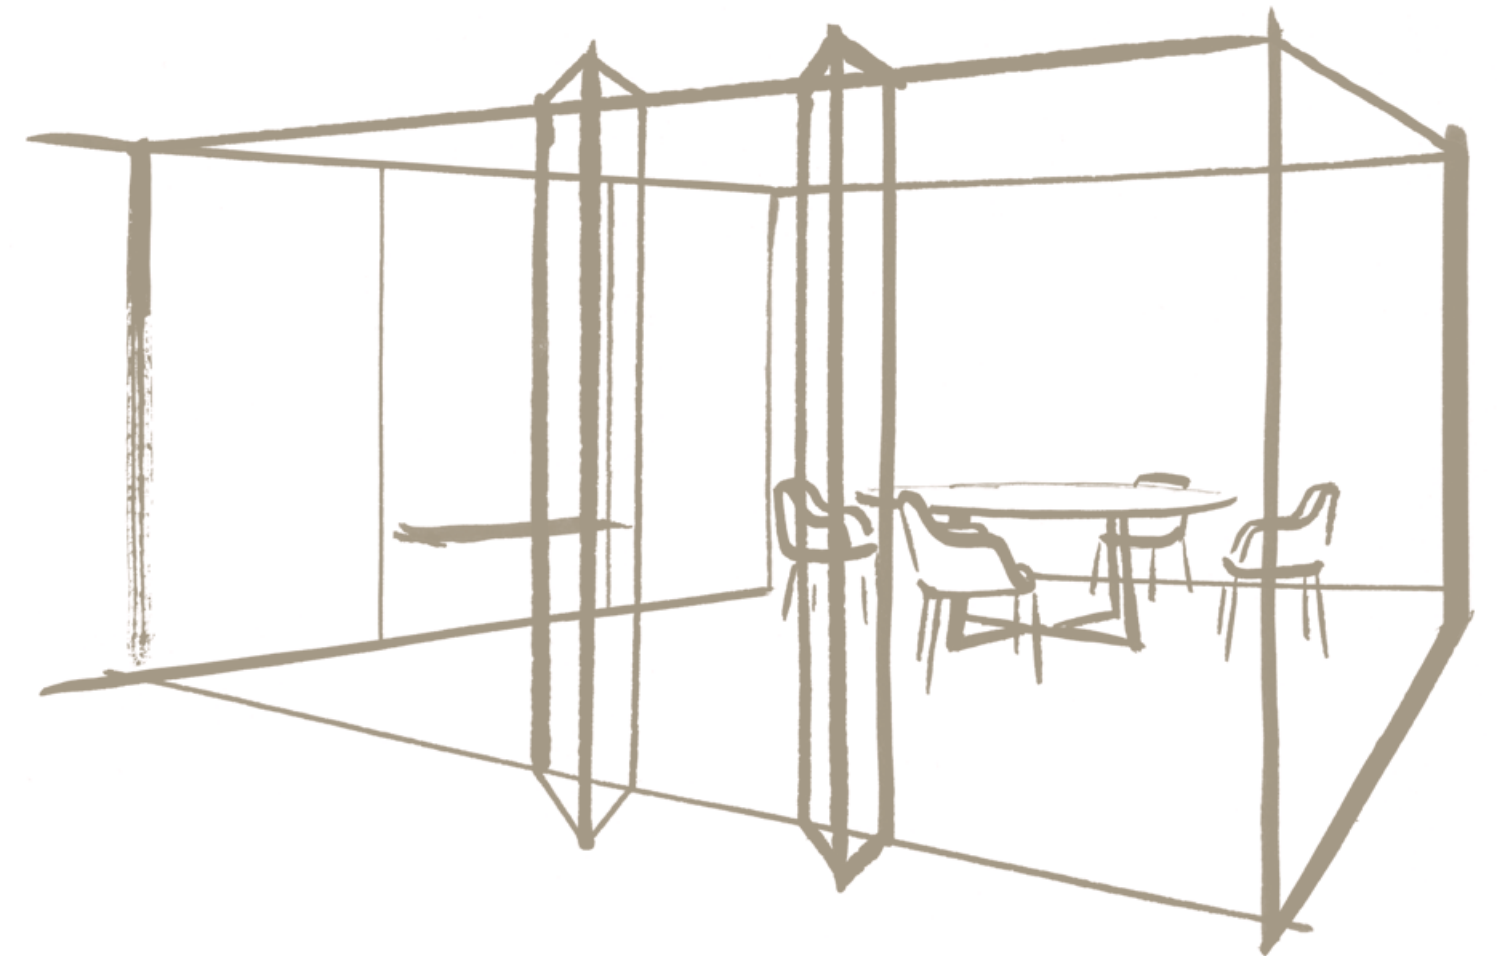

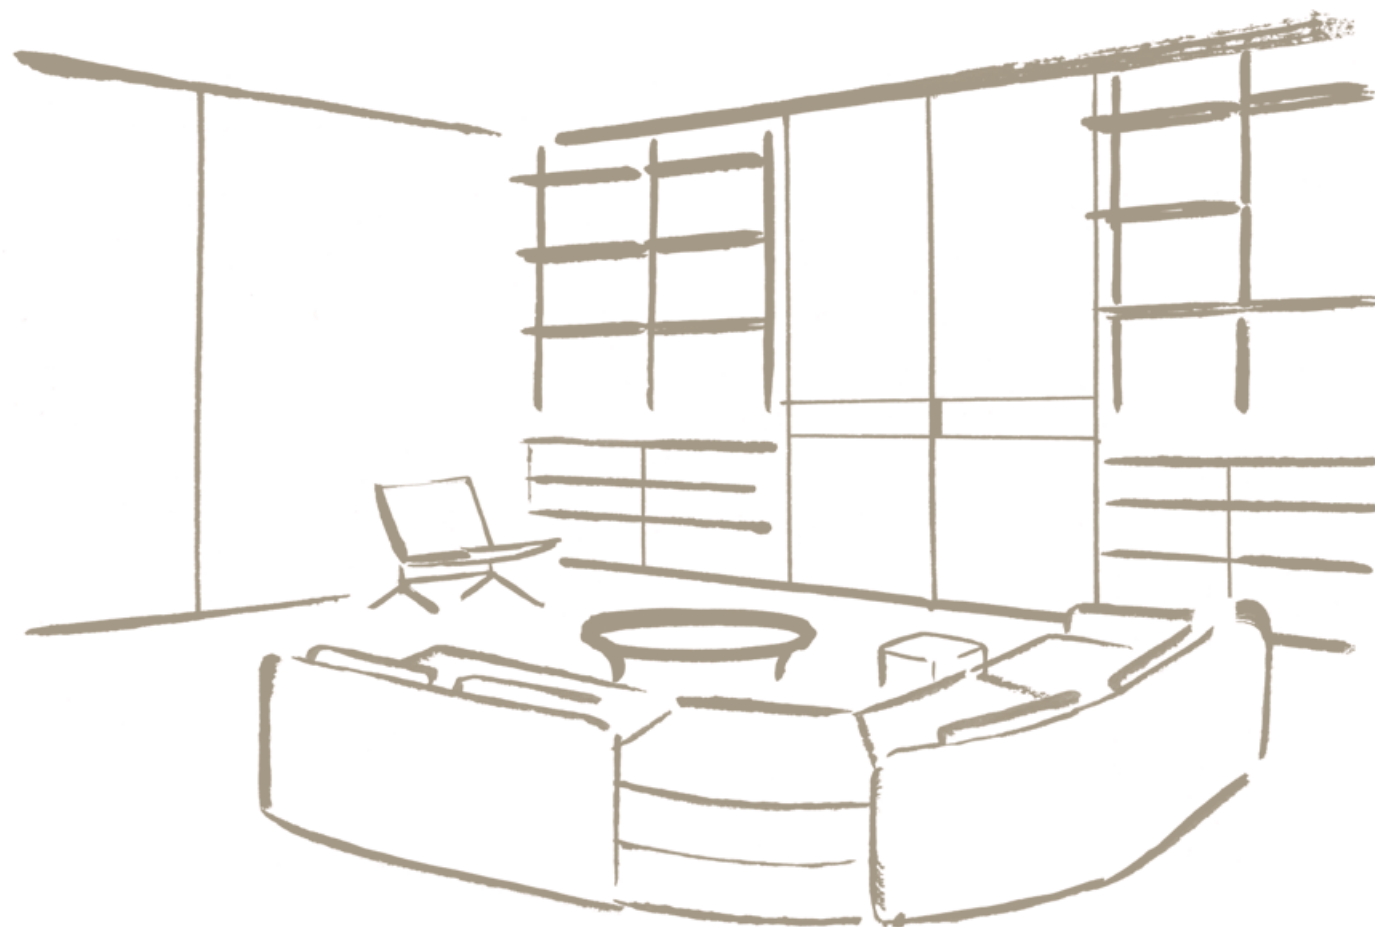

L'idea di casa passa attraverso la costruzione di spazi che si adattano a gusti, abitudini e stili di vita. Grazie alla boiserie, il retro di cucine, armadi e librerie si adatta all'ambiente, diventando una parete da attrezzare in base alle proprie esigenze.

The idea of home passes through the construction of spaces that adapt to tastes, habits and lifestyles. Thanks to the panelling, the back wall of kitchens, wardrobes and bookcases adapts to the environment, becoming a wall to be equipped in accordance with individual needs.

L'architettura è creazione di spazi dotati della qualità della permanenza. Ma se diventa leggera, può dare vita ad ambienti più flessibili, superando il concetto di costruzione tradizionale a favore della progettazione libera di spazi su misura.

Architecture is the creation of spaces with the quality of permanence. But if it becomes lightweight, it can create more flexible environments, overcoming the concept of traditional construction in favour of freely designed, made-to-measure spaces.

I sistemi nascono sempre ispirandosi a principi di organizzazione e integrazione. Architectural ne offre un'interpretazione contemporanea, dove attrezzature, TV e vani tecnici uniscono funzionalità e discrezione.

The systems are always inspired by principles of organisation and integration. Architectural offers a contemporary interpretation, where fittings, TVs and technical compartments combine functionality and discretion.

PIVOT DOOR SYSTEM

Pivot è un sistema di aperture pivotanti integrate ai sistemi Poliform. Con finiture e maniglie che riprendono quelle degli armadi della collezione Night System e delle ante della collezione Kitchen, Pivot assicura una perfetta continuità visiva.

Pivot is a system of pivoting openings integrated with Poliform systems. With finishes and handles that recall those of the Night System wardrobes collection and the Kitchen collection doors, Pivot ensures perfect visual continuity.

Nella zona notte, Pivot si integra al sistema di armadi Senzafine. Sia la porta Pivot Plus sia le ante dell'armadio sono in rovere spessart con telaio e maniglia Plus in ardesia opaco.

In the sleeping area, Pivot integrates with the Senzafine wardrobe system. Both the Pivot Plus door and the wardrobe doors are in spessart oak with Plus frame and handle in mat ardesia.

Nel disimpegno, le porte Pivot Plus in rovere spessart si abbinano all'armadio Senzafine Cover in tessuto lino chiaro, con maniglie e profili in champagne opaco.

In the bedroom hallway, the Pivot Plus doors in spessart oak match the Senzafine Cover wardrobe upholstered in lino chiaro fabric, with mat champagne handles and profiles.

Poliform personalized Infinity modular system with lighted extractor module and lighted modules, finish scotch brite steel and fumé glass.

SURFACE BOISERIE SYSTEM

Surface è un sistema di boiserie per il rivestimento di pareti, retro di armadi e interpareti in continuità estetica. Con Surface, con cui si progettano configurazioni angolari e intercape-dini attrezzate, Poliform trasforma un semplice rivestimento in un elemento architettonico capace di esprimere lo spazio al massimo delle sue potenzialità.

Surface is a panelling system for cladding walls, the backs of wardrobes and partitions, providing aesthetic continuity. With Surface, which can be used to design corner configurations and furnished spaces, Poliform transforms a simple wall covering into an architectural element capable of expressing space to its full potential.

Grazie al profilo per angolo aperto, con la boiserie Surface si realizzano anche composizioni angolari. Nell'integrazione con l'armadio Senzafine si crea un angolo home office appartato e discreto. Surface è in tessuto lino chiaro con profili champagne opaco; stesse finiture per l'armadio Senzafine Cover con apertura battente.

Thanks to the open corner profile, Surface panelling can also be used to create corner compositions. Integration with the Senzafine wardrobe creates a secluded and discreet home office corner. Surface is in lino chiaro fabric with mat champagne profiles; the same finishes are used for the Senzafine Cover wardrobe with leaf opening.

SURFACE
DAY AREA 1

- 1

Code top shelf, spessart oak, led light, ardesia profiles.
- 9

Code hanging thick shelf, spessart oak, mat champagne channel, led light.

Nella zona giorno, la boiserie Surface, attrezzata con mensolone Code, disegna delle nicchie in cui integrare la libreria Lexington. Tre le finiture della composizione: tessuto lino scuro, Inalco MDi® rigato scuro e olmo nero, sempre con profili in ardesia opaco, come i montanti del sistema Lexington.

In the living area, the Surface panelling, equipped with a Code shelf, creates niches in which the Lexington bookcase can be integrated. There are three finishes for the composition: lino scuro fabric, rigato scuro Inalco MDi® and black elm, again with profiles in mat ardesia, like the uprights of the Lexington system.

- 7

Lexington bookshelf, floor to ceiling uprights in black elm and mat ardesia with adjustment feet in nickel ardesia, led light. Shelves and storage units with flap door, black elm and mat ardesia.

Nell'area guardaroba, la boiserie Surface e la porta Pivot Plus sono usate in combinazione con la cabina armadio Lexington. La boiserie Surface è usata sia a copertura del retro degli armadi, in finitura lino chiaro, sia come schienale del sistema Lexington, in rovere spessart come la porta Pivot. A centro stanza, Surface dà vita all'area specchi e vanity.

In the wardrobe area, the Surface panelling and Pivot Plus door are used in combination with the Lexington walk-in wardrobe. The Surface panelling is used both to cover the back of the wardrobes, in lino chiaro finish, and as a back of the Lexington system, in spessart oak like the Pivot door. In the middle of the room, Surface brings the mirrors and vanity area to life.

Surface wall panelling, solution for outer corner.

LINK PARTITION WALL SYSTEM

Link è un sistema di pannelli con cui si creano pareti, anche dotate di aperture, per suddividere e collegare gli spazi interni. I pannelli fissi possono essere intervallati da ante rototraslanti o scorrevoli. Link è progettato su misura e si integra a tutti i sistemi Poliform con soluzioni lineari, angolari, a tre o quattro lati.

Link is a system of panels which can be used to create walls and openings to divide and connect internal spaces. The fixed panels can be interspersed with sliding or rototranslating doors. Link is designed-to-measure, and integrates with all Poliform systems with linear, angular, and three- or four-side solutions.

Nella zona giorno, l'abbinamento di due ante con apertura rototraslante dà vita a un portale dall'effetto scenografico. I pannelli sono in vetro trasparente riflettente, con telaio e maniglia Plus in finitura champagne opaco.

In the living area, the combination of two rototranslating doors creates a portal with a scenic effect. The panels are made from transparent reflective glass, with frame and Plus handles finished in mat champagne.

LINK
ROTOTRANSLATING DOOR

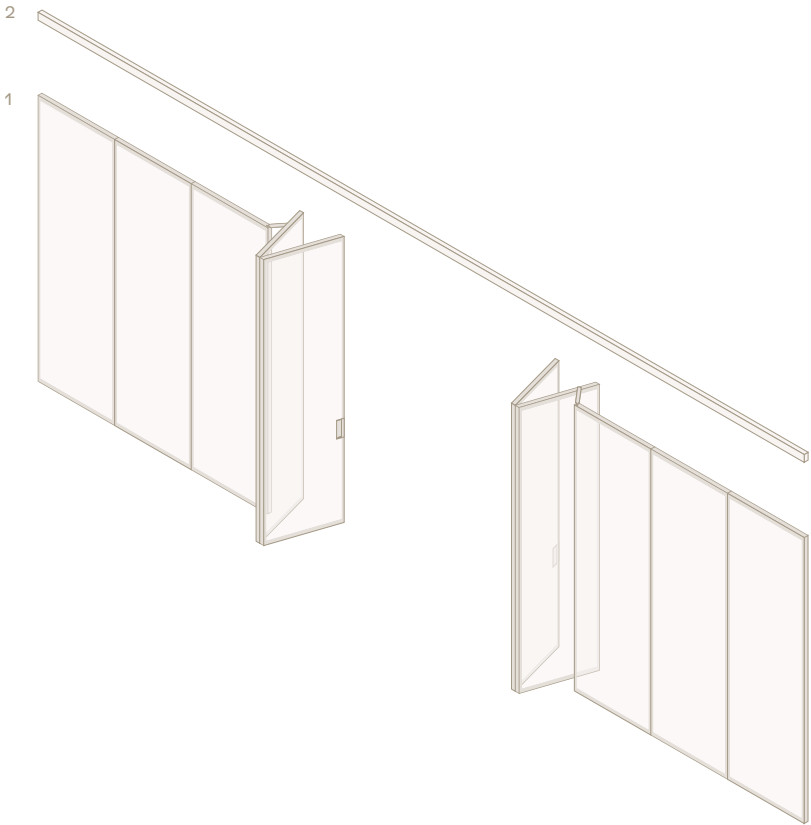

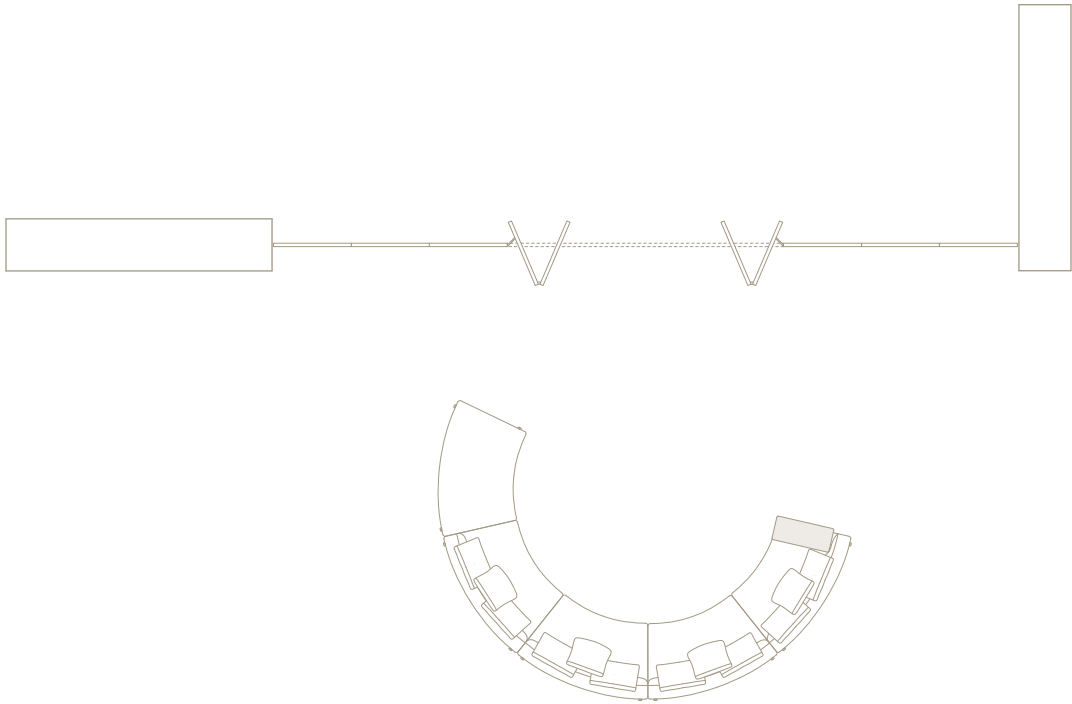

- 1

Sistema interparete Link, composizione lineare con pannelli fissi e due ante apertura rototraslante doppia. Pannelli vetro trasparente riflettente, telaio champagne opaco. Ante vetro trasparente riflettente, telaio e maniglia Plus champagne opaco.
- 2

Binario monorotaia a incasso, finitura bianco opaco.
- 1

Link partition wall system, linear composition with fixed panels and two doors with double rototranslating opening. Panels in transparent reflective glass, mat champagne frame. Doors in transparent refelctive glass, frame and Plus handle mat champagne.
- 2

Built-in one-way track, mat white finish.

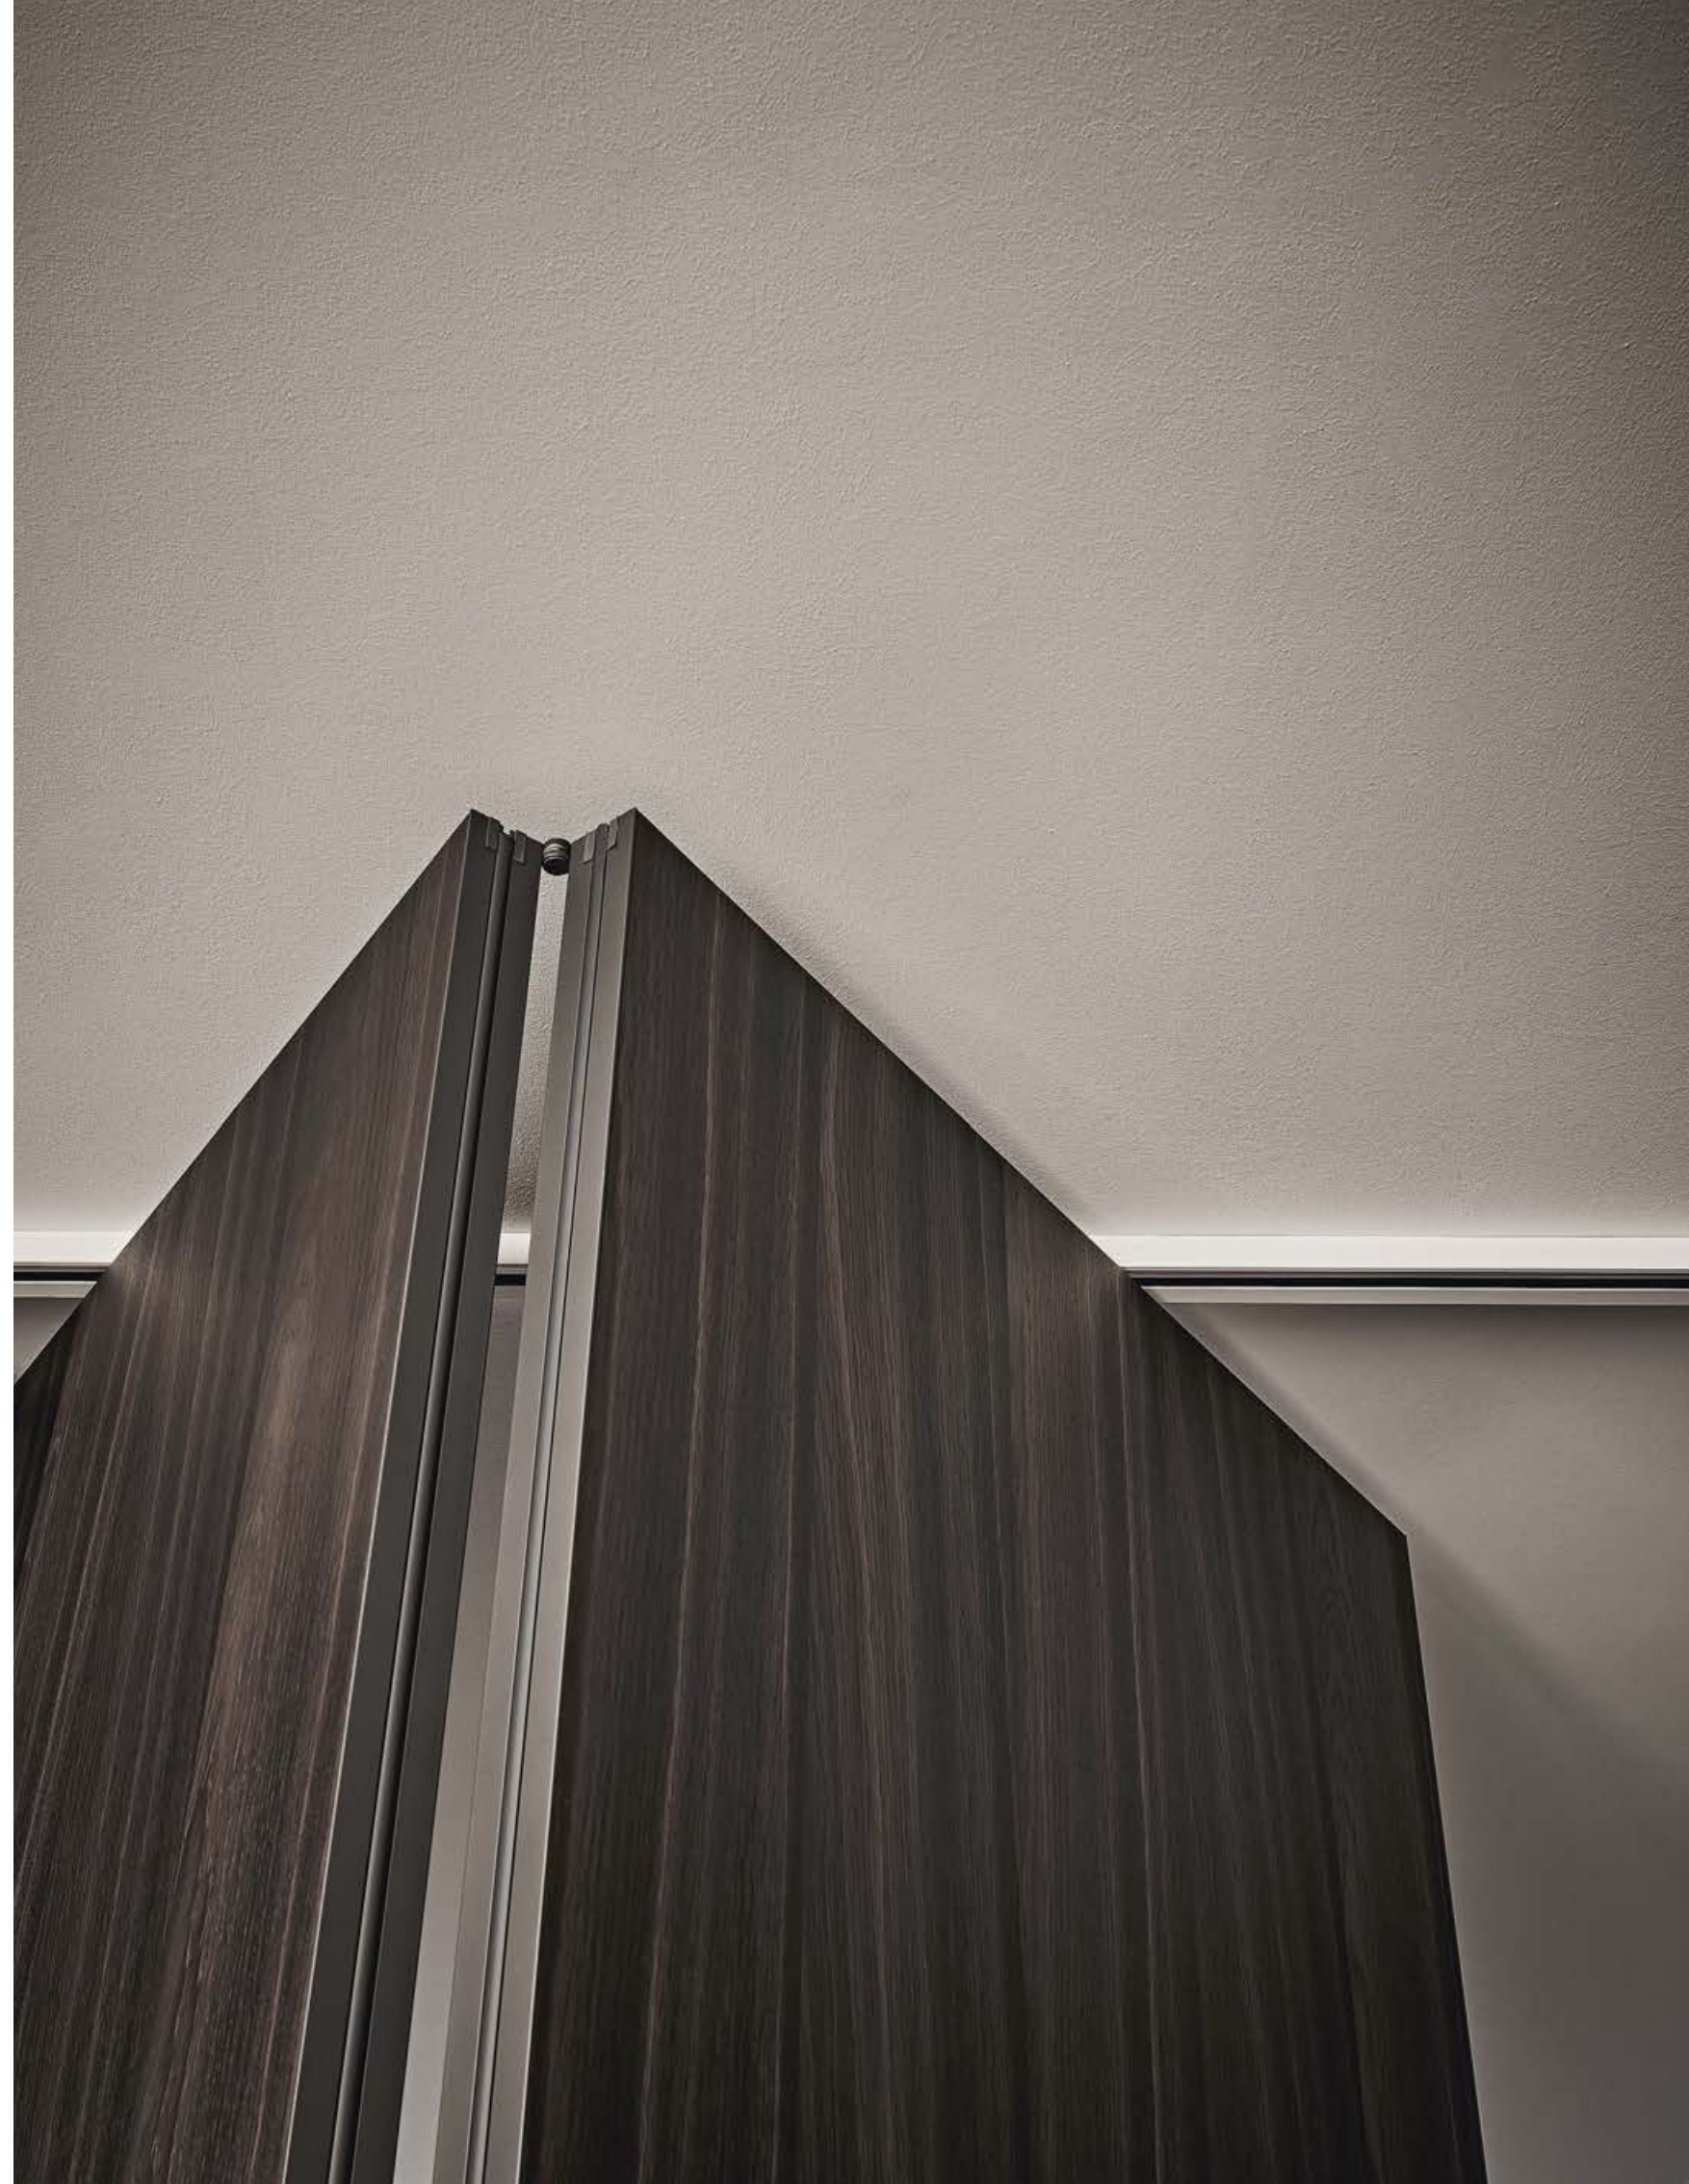

Il sistema Link si integra ad armadi e boiserie, anche in composizioni angolari. La finitura rovere spessart di pannelli e ante rototraslanti richiama quella dell'armadio Senzafine.

The Link system can also be combined with wardrobes and panelling, including those of an angular composition. The spessart oak finish of the panels and rototranslating doors are reminiscent of that of the Senzafine wardrobe.

SLIDING DOOR

- 1

Sistema interparete Link, composizione lineare con due ante apertura scorrevole. Ante laccato metallico bronzo, profili e maniglia Plus ardesia opaco.
- 2

Binario monorotaia incasso a filo, finitura bianco opaco.
- 3

Boiserie Surface tessuto lino scuro, Inalco MDi® rigato scuro e olmo nero, profili ardesia opaco.
- 4

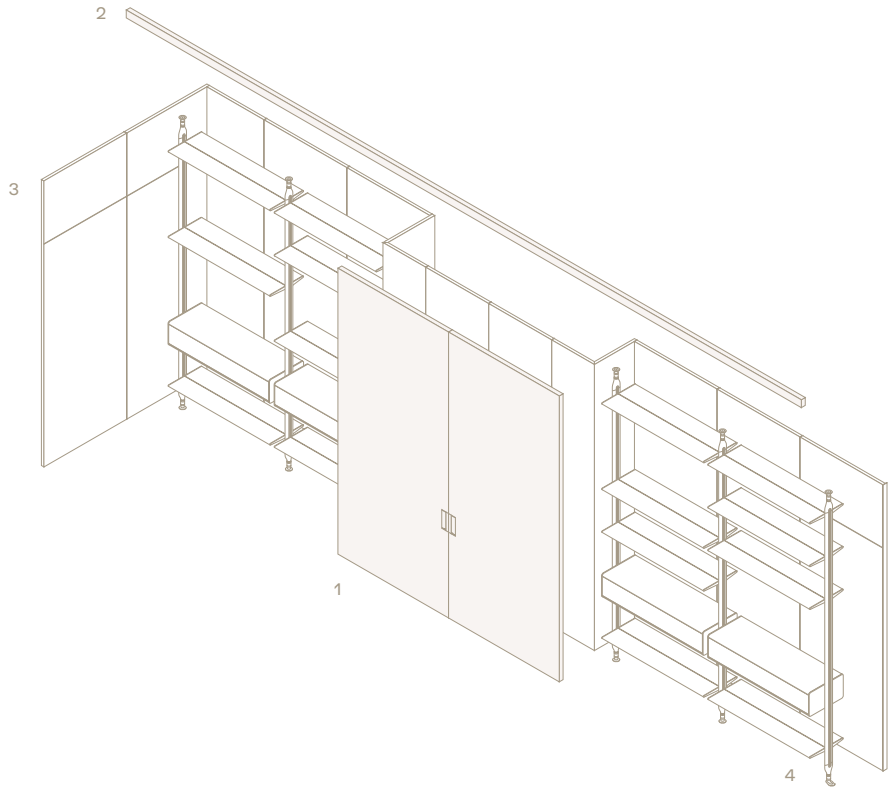

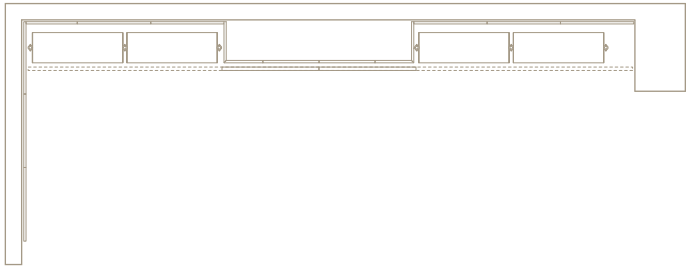

Libreria Lexington, montanti a soffitto olmo nero e ardesia opaco con piedini di regolazione in nickel ardesia, luce a led. Ripiani e contenitori con anta a ribalta, olmo nero e ardesia opaco.
- 1

Link partition wall system, linear composition with two doors with sliding opening. Doors in metal lacquer bronze, profiles and Plus handle mat ardesia.
- 2

Flush built-in one-way track, mat white finish.
- 3

Surface wall panellingin fabric lino scuro, Inalco MDi® rigato scuro and black elm, mat ardesia profiles.
- 4

Lexington bookshelf, floor to ceiling uprights in black elm and mat ardesia with adjustment feet in nickel ardesia, led light. Shelves and storage units with flap door, black elm and mat ardesia.

PIVOT DOOR SYSTEM
Design Studio Kairos

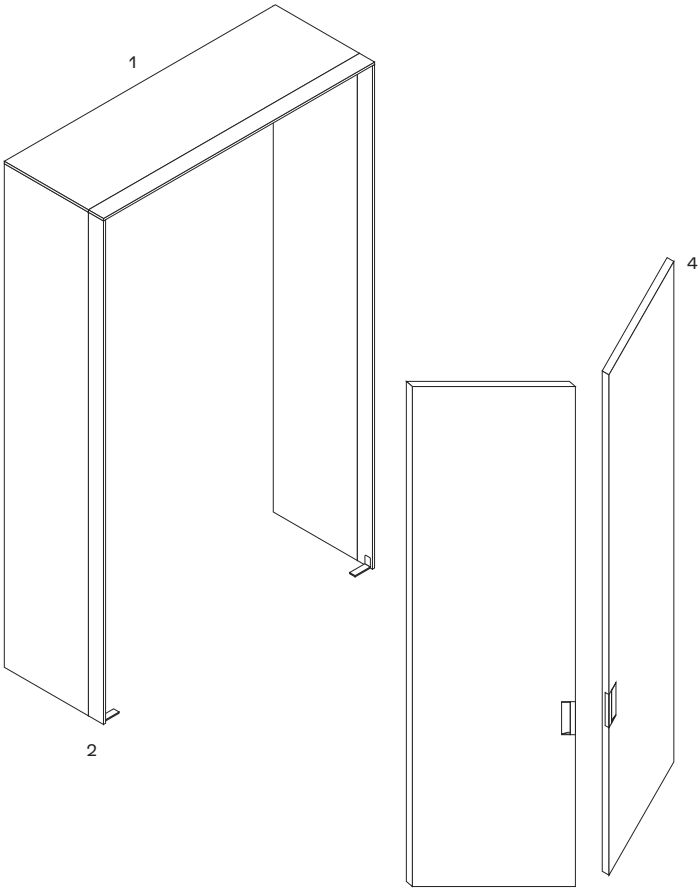

Pivot è un sistema di porte singole o doppie, apertura a bilico, composte da un portale che si integra con gli armadi del sistema Senzafine e i pannelli boiserie Surface sul retro armadio o con le colonne della collezione cucine. La porta a bilico è una porta che si apre e chiude ruotando attorno ad un asse verticale costituito da due perni. Al portale viene fissato nella parte anteriore o posteriore lo stipite per l'aggancio della porta. Le porte Pivot riprendono finiture e maniglie della collezione armadi Senzafine o della collezione Kitchen Collection, per assicurare, in accostamento, una perfetta continuità visiva.

- 1 Portale, costituito da un coperchio con stipite e due fianchi con stipite
- 2 Stipite metallico comprensivo di cerniere a bilico
- 3 Porta singola
- 4 Porta doppia

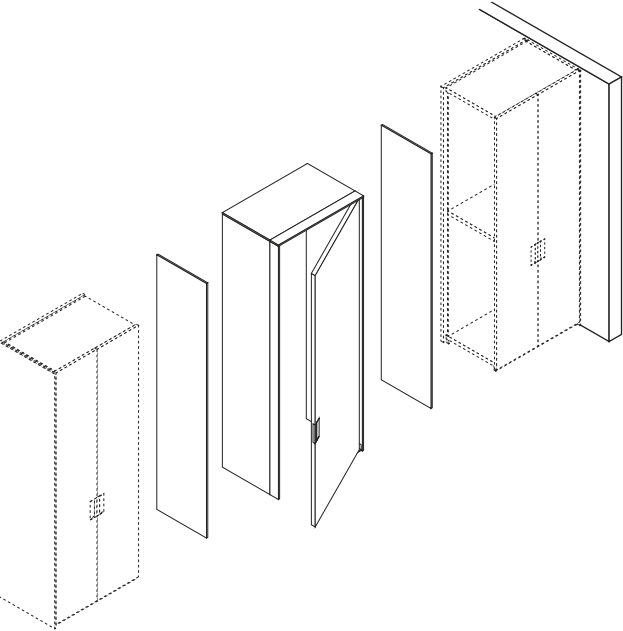

Pivot is a system of single or double doors, pivot opening, composed by a portal integrated with the wardrobes of the Senzafine system and the Surface panels to the back of the wardrobe or with the tall units of the kitchen collection. The pivot door is a door which opens and closes by rotating around a vertical axis consisting of two pins. A jamb for the door fixing is applied to the front or rear part of the portal. Pivot doors follow finishes and handles of the wardrobe collection Senzafine or of the Kitchen Collection, to grant perfect visual continuity when combined together.

- 1 Portal, composed by a header with jamb and two side panels with jamb
- 2 Metal jamb comprehensive of pivot hinges
- 3 Single door
- 4 Double door

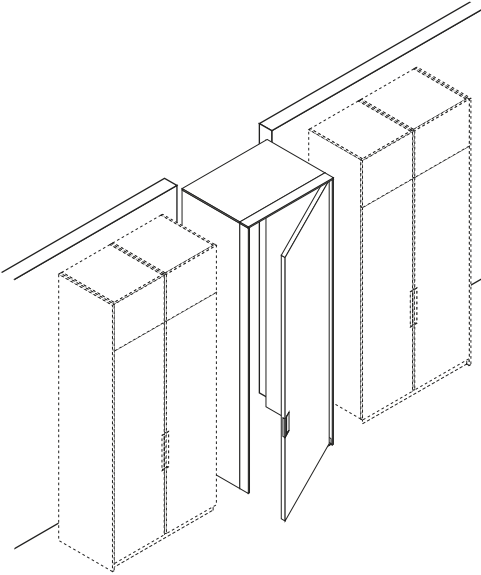

Pivot tra due armadi
Pivot between two wardrobes

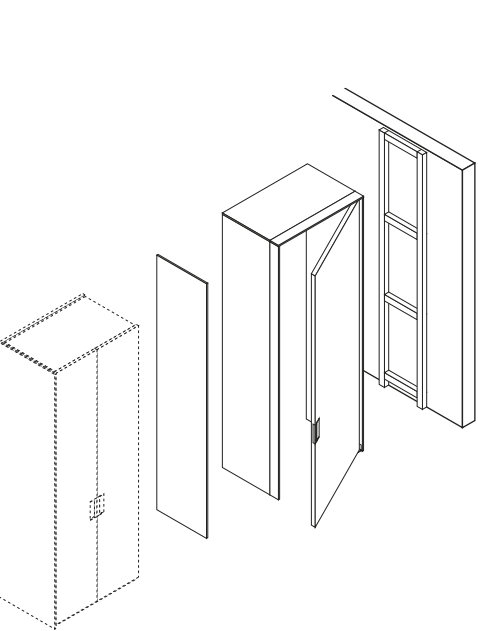

Per l'accostamento del portale all'armadio è necessario utilizzare un fianco interno spessore 15, predisposto per fissare lo stipite, al posto del fianco laterale di serie.
To combine portal and wardrobe it is necessary to use a 1/2" thick internal side, arranged to fix the jamb, instead of the standard lateral side.

Pivot tra due colonne cucina
Pivot between two kitchen tall units

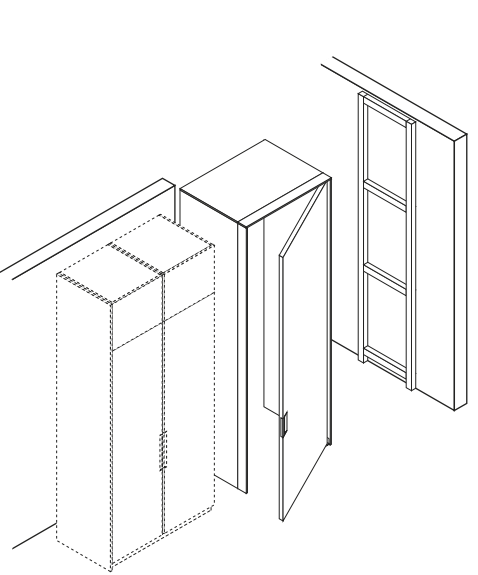

La struttura delle colonne della cucina viene predisposta per il fissaggio del portale.
The structure of the tall units is arranged to fix the portal.

Pivot tra armadio e parete
Pivot between wardrobe and wall

Per l'accostamento del portale alla parete è necessario utilizzare un telaio a parete predisposto per fissare lo stipite. Telaio con regolazione telescopica, spessore da 35 a 55.
To combine portal and wall it is necessary to use a wall frame arranged to fix the jamb. Frame with telescopic adjustment, thickness from 1 1/2" to 2 1/4".

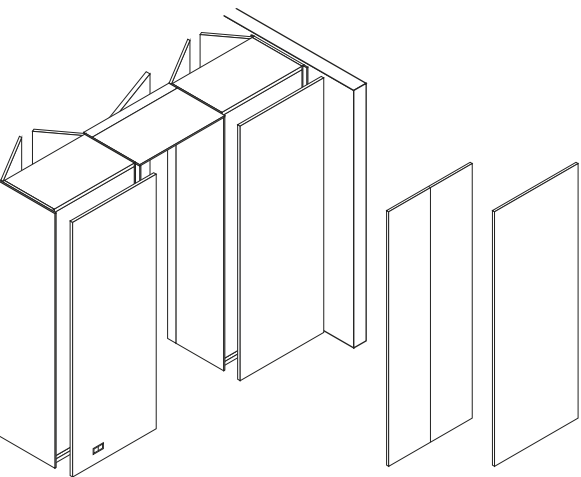

Pivot tra colonna cucina e parete
Pivot between kitchen tall unit and wall

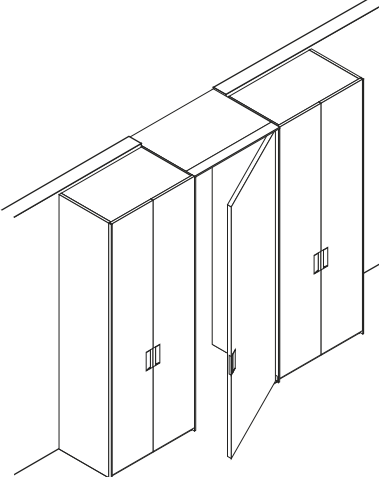

Per l'accostamento del portale alla parete è necessario utilizzare un telaio a parete predisposto per fissare lo stipite. Telaio con regolazione telescopica, spessore da 35 a 55.
To combine portal and wall it is necessary to use a wall frame arranged to fix the jamb. Frame with telescopic adjustment, thickness from 1 1/2" to 2 1/4".

PIVOT CON ARMADIO
PIVOT WITH WARDROBE

Retro armadio
Back of the wardrobe

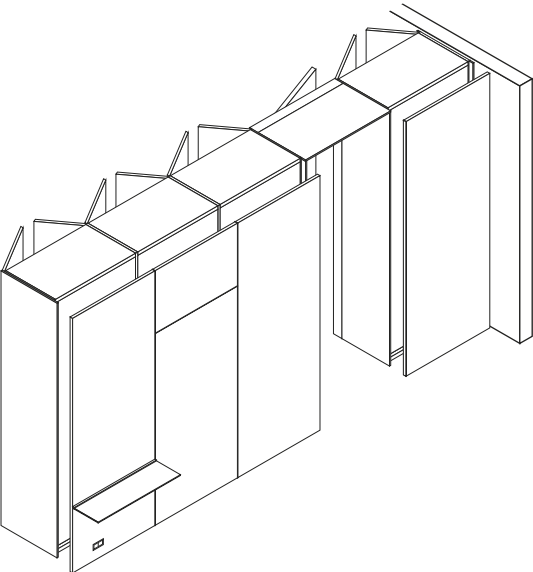

Per gli armadi centro stanza, la boiserie Surface retro armadio può essere sostituita dalle ante fisse o dai pannelli PL a terra spessore 25.
For freestanding wardrobes Surface wall panelling at the back of the wardrobe can be replaced by fixed doors or PL floorstanding panels thickness 1".

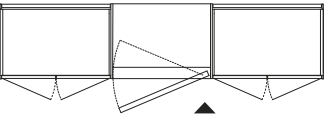

Solo con gli armadi a parete, e il passaggio con la porta Pivot, lo schienale è standard.
Only with wall wardrobes and passage with Pivot door the back panel is standard.

Retro armadio con boiserie
Back of the wardrobe with wall panelling

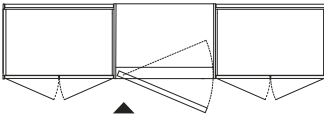

La boiserie retro armadio, ad altezza unica o sovrapposta, può essere attrezzata (escluso specchio) con una sola mensola Code per pannello, con e senza luce a led (p 280-300, spessore 8), con il modulo di cablaggio per una presa elettrica o due prese usb o con gli specchi Drop, Circle e Audrey.
The wall panelling in one piece or superimposed can be accessorized (except mirror) with one Code shelf for panel, with or without led light (d 11"-11 3/4", thickness 1/4"), with the wiring module for one electric socket or for two usb sockets or with Drop, Circle and Audrey mirrors.

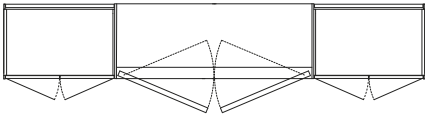

Tipologie aperture
Opening typologies

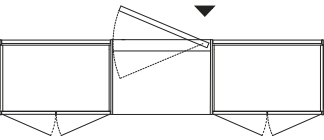

porta singola, allineamento ante armadio - apertura dx
single door, wardrobe doors alignment - right opening

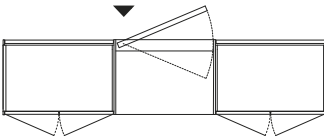

porta singola, allineamento ante armadio - apertura sx
single door, wardrobe doors alignment - left opening

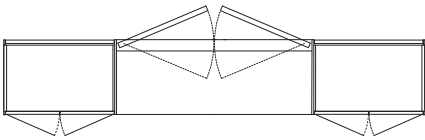

porta doppia, allineamento ante armadio
double door, wardrobe doors alignment

porta singola, allineamento retro armadio - apertura sx
single door, wardrobe back alignment - left opening

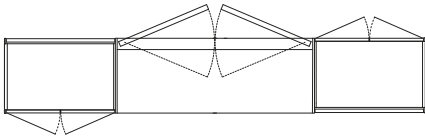

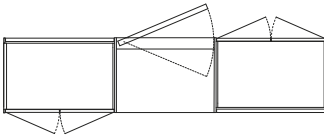

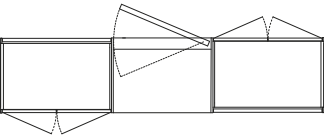

porta singola, allineamento retro armadio - apertura dx
single door, wardrobe back alignment - right opening

porta doppia, allineamento retro armadio
double door, wardrobe back alignment

Per determinare la tipologia di apertura della porta Pivot singola si deve sempre guardare il disegno dal lato esterno della porta.
To establish the opening type of the Pivot single door always consider the external side of the door.

Tipologie compositive con armadi
Composition typologies with wardrobes

La porta Pivot si può allineare alle ante dell'armadio, al retro armadio o a entrambe.
Pivot door can be aligned with the wardrobe doors, with the back of the wardrobe or with both.

PIVOT CON ARMADIO
PIVOT WITH WARDROBE

Il portale Pivot è realizzabile con almeno un lato armadio. L'armadio sul quale viene fissato il portale deve avere apertura battente, la larghezza minima di 941 e la profondità di 584. L'armadio deve necessariamente essere finito sul retro, armadio centro stanza con boiserie, pannelli PL o ante fisse, armadio a parete con schienale standard.

- 1

Fianco laterale spessore 15+15.
- 2

Fianco interno per armadio spessore 15 e fianco esterno portale spessore 14.
- 3

Fianco laterale spessore 25, con sagome di finitura lato ante e lato boiserie retro armadio.
- 4

Fianco laterale spessore 25, con sagome di finitura lato ante.
- 5

Profili telescopici di compensazione Pivot in ardesia o champagne.

Pivot portal can be realized with at least one wardrobe element. The wardrobe must have leaf opening in order to fix the portal, minimum width of the unit 37" and depth 23". The wardrobe must be finished at the back: freestanding wardrobe with wall panelling, PL panels or fixed doors, wall wardrobe with standard back panel.

- 1

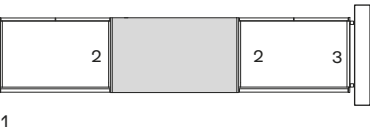

Lateral side thickness 1/2"+1/2".
- 2

Inner side for wardrobe thickness 1/2" and external side of the portal thickness 1/2".
- 3

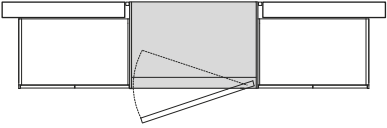

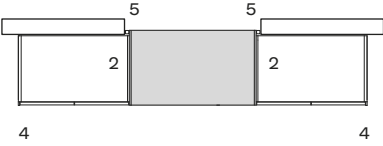

Lateral side thickness 1", with finishing profile on the door side and wall panelling on the back side.
- 4

Lateral side thickness 1", with finishing profiles on the door side.
- 5

Telescopic adjustment profiles Pivot in ardesia or champagne.

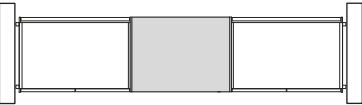

Pivot profondità standard.
La porta Pivot si può allineare alle ante dell'armadio o al retro armadio.
Pivot standard depth.
Pivot door can be aligned with the wardrobe doors or with the back of the wardrobe.

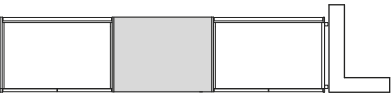

* Pivot profondità a misura.
La porta Pivot non può essere montata a filo muro, perchè lo stipite verticale viene fissato al fianco interno dell'armadio.
Pivot customized depth.
Pivot door can not be installed flush to the wall because the vertical jamb must be fixed to the wardrobe inner side.

PIVOT CON ARMADIO
PIVOT WITH WARDROBE

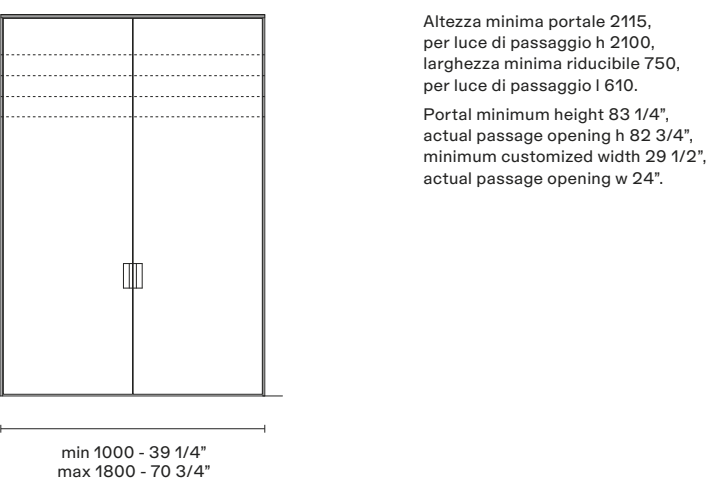

Dimensioni
Portale Pivot realizzabile al millimetro, da fissare tra due armadi apertura battente p 584 o tra un armadio p 584 e una parete, in questo caso è necessario il telaio a parete. Portale disponibile in quattro altezze, riducibile a misura (portale ed armadio). La larghezza viene gestita al millimetro. La profondità è di 664 in accostamento ad armadi centro stanza (armadi p 584 con retro armadio), o viene gestita al mm in accostamento con armadi a parete. Portale Pivot spessore mm 14, porta Pivot spessore mm 45.

Dimensions
Pivot portal can be customized to the millimeter, to be fixed between two leaf opening wardrobes d 23" or between a wardrobe d 23" and a wall, in this case the wall frame is necessary. Portal available in four heights, customizable (portal and wardrobe). The width is managed to the millimeter. The depth is 26 1/4" when combined with freestanding wardrobes (wardrobes d 23" with rear panelling), or managed to the mm when combined with wall wardrobes. Pivot portal thickness 1/2", Pivot door thickness 1 3/4".

Altezza e larghezza

SURFACE BOISERIE SYSTEM

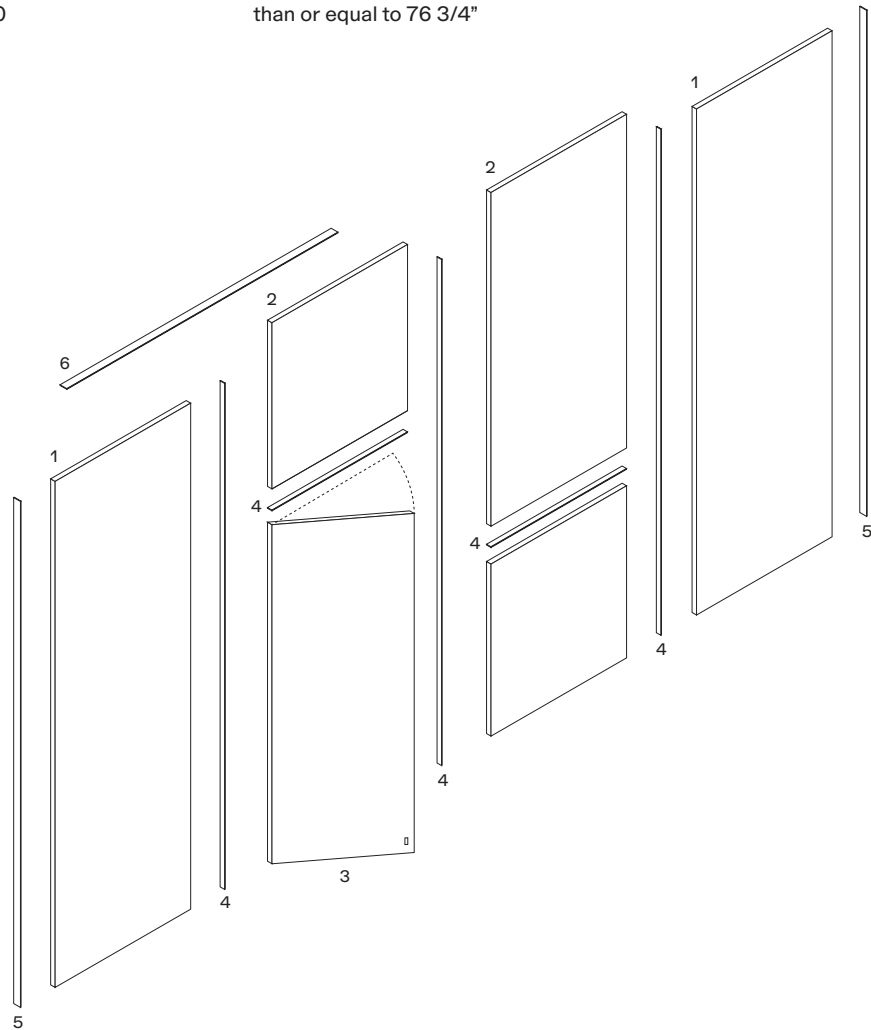

Design R&D Poliform

Surface è un sistema boiserie per rivestire pareti e retro armadi in modo continuo. La boiserie (escluso specchio) si può attrezzare con i componenti del sistema giorno e notte Code ed è integrabile con gli armadi Senzafine e le porte Pivot. Il sistema prevede staffe di fissaggio a muro (ingombro mm 15) per l'aggancio dei pannelli distanziati da profili in alluminio verniciato. I pannelli (spessore mm 30) sono dotati di piedini di regolazione a terra e di profili di chiusura verticali o orizzontali. Possibilità di composizioni con pannelli sovrapposti anche a misura e di soluzioni per angoli chiusi o aperti. La boiserie Surface è disponibile in diversi materiali e finiture, i profili sono verniciati ardesia o champagne opaco.

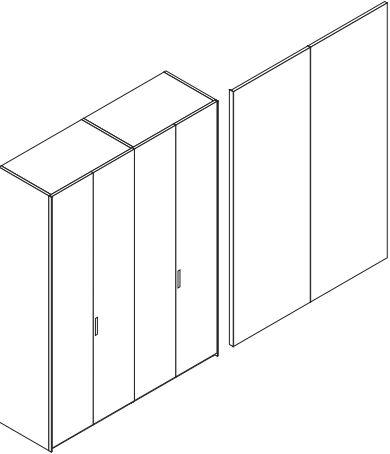

- 1
- Boiserie ad altezza unica
- 2
- Boiserie sovrapposte
- 3
- Boiserie ispezionabile, (escluso retro armadio e nelle finiture Inalco MDi® e specchio), maniglia ardesia o champagne
- 4
- Profili in alluminio mm 4, profondità 30
- 5
- Profili di chiusura verticali in alluminio mm 4, profondità 45
- 6
- Profilo di chiusura orizzontale mm 4, profondità 45, per boiserie con altezza inferiore o uguale a 1950

Surface is a wall panelling system to cover the walls and the backs of the wardrobes in a continuous way. The wall panelling (except mirror) can be accessorized with the components of the Code day and night system and can be integrated with the Senzafine wardrobes and the Pivot doors. The system works with wall fixing brackets (thickness 1/2") to hang the panels with painted aluminium profiles between each panel. Panels (thickness 1 1/4") are supplied with adjustment feet to the floor and with vertical and horizontal closing profiles. It is possible to superimpose the panels, also in customized size and solutions for corners and open corners are available, too. Surface wall panelling is available in several materials and finishes, the profiles are painted in mat ardesia or champagne.

- 1
- Wall panelling in one piece
- 2
- Superimposed wall panelling
- 3
- Wall panelling with service opening (except wardrobe back and finishes Inalco MDi® and mirror), ardesia or champagne handle
- 4
- Aluminium profiles 1/8", depth 1 1/4"
- 5
- Vertical closing profiles in aluminium 1/8", depth 1 3/4"
- 6
- Horizontal closing profile 1/8", depth 1 3/4", for wall panelling with height less than or equal to 76 3/4"

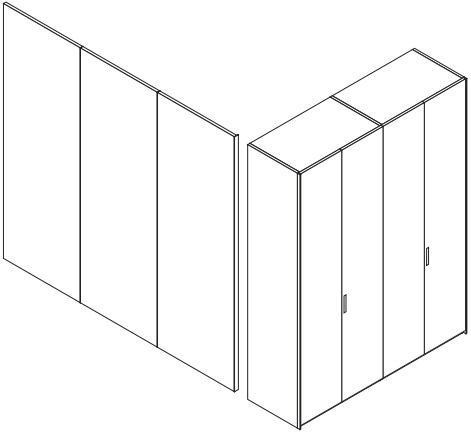

Boiserie in accostamento all'armadio
Wall panelling next to the wardrobe

La boiserie può essere accostata a filo ante di un armadio Senzafine, in accostamento il fianco dell'armadio deve avere la sagoma e il pannello boiserie il profilo mm 4.

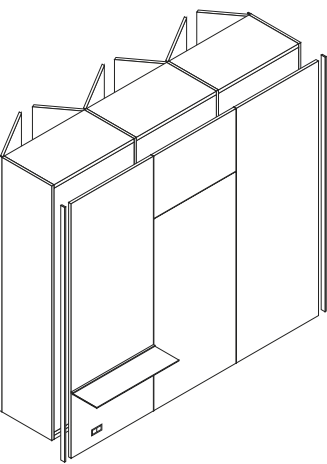

Wall panelling can be installed flush with the doors of a Senzafine wardrobe, in this case the wardrobe side must have the profile and the wall panel must have the 1/8" profile.

La boiserie può essere accostata al fianco di un armadio Senzafine, in accostamento il pannello boiserie deve avere il profilo mm 4.

Wall panelling can be installed next to the side of a Senzafine wardrobe, in this case the wall panel must have the 1/8" profile.

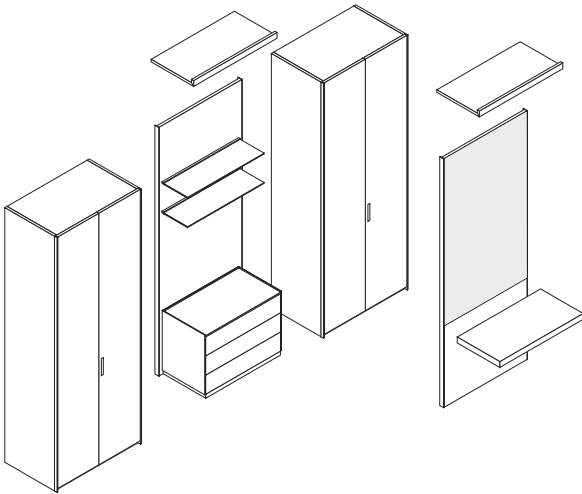

Boiserie retro armadio
Wall panelling to the back of the wardrobe

I pannelli boiserie devono essere finiti ai lati con sagome di finitura per boiserie retro armadio, larghezza mm 14. La boiserie retro armadio, ad altezza unica o sovrapposta, può essere attrezzata (escluso specchio) con una sola mensola Code per pannello, con e senza luce a led (p 280-300, spessore 8), con il modulo di cablaggio per una presa elettrica o due prese usb o con gli specchi Drop, Circle e Audrey.

The wall panels must be closed at the sides with finishing profiles for wall panelling to the back of the wardrobe width 1/2". The wall panelling in one piece or superimposed can be accessorized (except mirror) with one Code shelf for panel, with or without led light (d 11"-11 3/4", thickness 1/4"), with the wiring module for one electric socket or for two usb sockets or with Drop, Circle and Audrey mirrors.

Boiserie tra due armadi
Wall panelling between two wardrobes

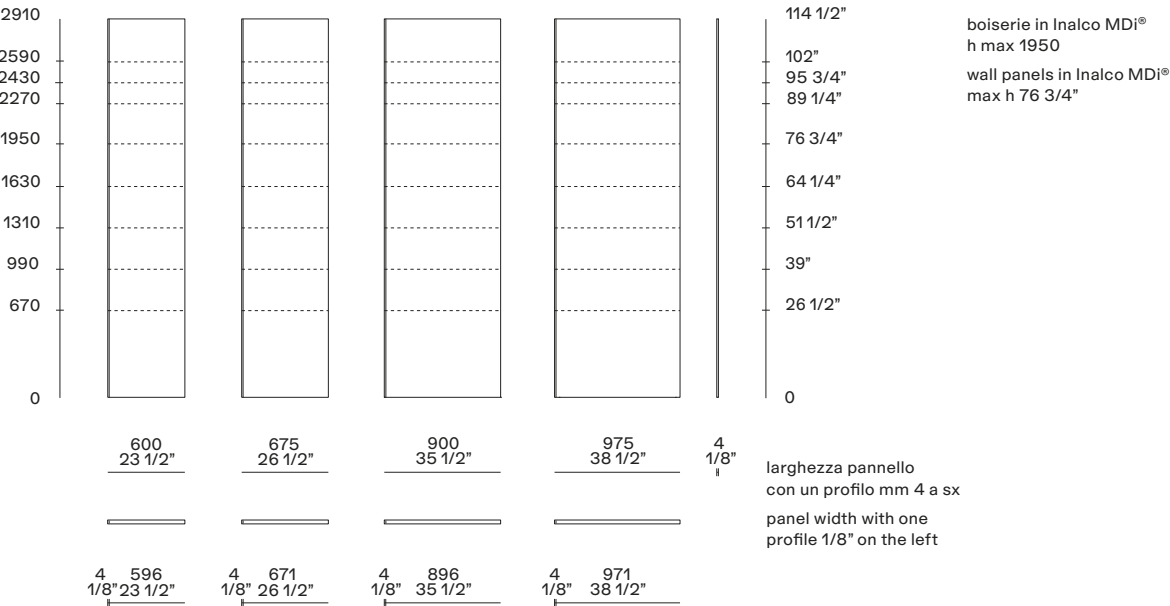

I pannelli boiserie devono essere finiti ai lati con i profili mm 4 e completati con un coperchio superiore, con e senza luce a led. La boiserie (escluso specchio) può essere attrezzata con mensole, contenitori, modulo di cablaggio per una presa elettrica o due prese usb e mensoloni sospesi Code, con e senza luce a led.

The wall panels must be closed at the sides with 1/8" profiles and on top with a shelf with and without led light. Wall panelling (except mirror) can be accessorized with shelves, storage units, wiring module for one electric socket or for two usb sockets and Code hanging thick shelves, with and without led light.

SURFACE
BOISERIE SYSTEM

Dimensioni
Pannelli boiserie disponibili in quattro larghezze e nove altezze, pannelli spessore mm 30, staffe di fissaggio a muro ingombro mm 15. Tutti i lati a vista delle boiserie devono essere completi di profilo verticale di chiusura. Per boiserie con altezza inferiore o uguale a 1950 è obbligatorio il profilo orizzontale superiore di chiusura. Per il montaggio in altezza è richiesto uno spazio superiore di 30 mm. Per il montaggio in larghezza è richiesto uno spazio laterale di 30 mm in presenza di profili verticali di chiusura e di 5 mm se non sono previsti profili verticali di chiusura (in nicchia). Limiti dimensionali: larghezza massima 975, minima 220; altezza massima 2910 (escluso Inalco MDi® altezza massima 1950), minima 600. Limiti dimensionali boiserie ispezionabile: larghezza massima 975, minima 400; altezza massima 2910, minima 900.)

Dimensions
Wall panels available in four widths and nine heights, panels thickness 1 1/4", wall fixing brackets thickness 1/2". All the exposed sides of the wall panelling must be completed with vertical closing profile. For wall panelling with height less than or equal to 76 3/4" the upper horizontal closing profile is obligatory. For installation in height a space of 1 1/4" is requested. For installation in width a lateral space of 1 1/4" in case of vertical closing profiles is requested, and of 1/8" if there are no vertical closing profiles (in niche). Dimensional limits: maximum width 38 1/2", minimum 8 3/4"; maximum height 114 1/2" (except Inalco MDi® maximum height 76 3/4"), minimum 23 1/2". Dimensional limits wall panelling with service opening: maximum width 38 1/2", minimum 15 3/4"; maximum height 114 1/2", minimum 35 1/2".

Soluzioni angolo
Corner solutions

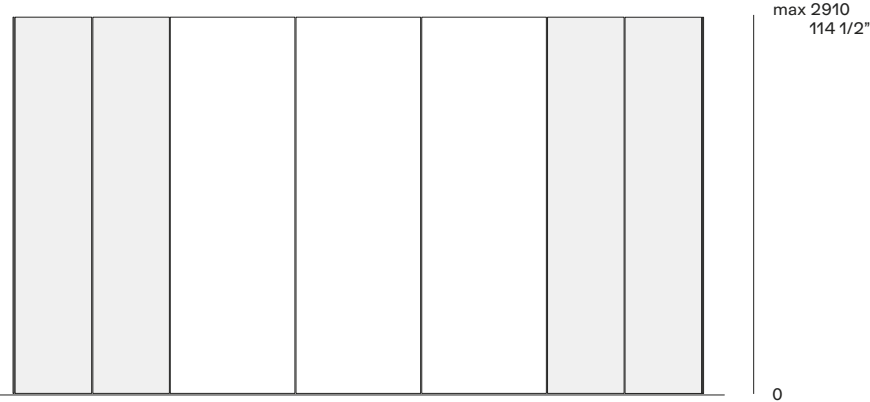

Angolo interno, profilo di serie sul pannello in battuta.
Inner corner, standard profile on the panel with visible edge.

Angolo esterno, pannelli sagomati con profilo per angolo. I pannelli sagomati non possono essere attrezzati.
Outer corner, shaped panels with profile for corner. Shaped panels can not be accessorized.

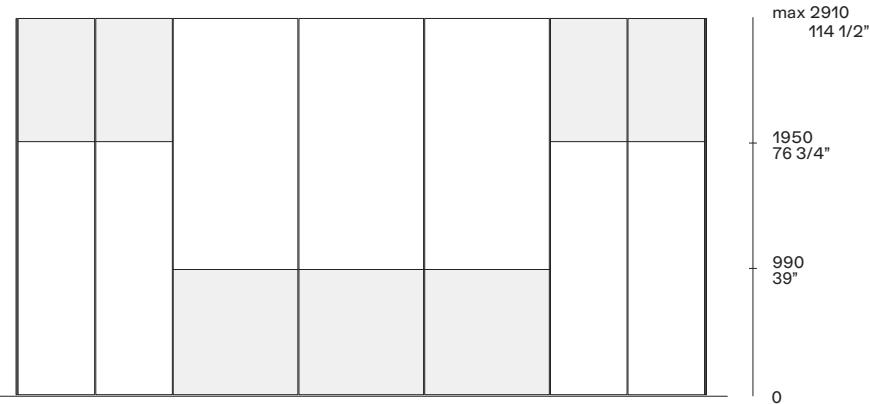

Boiserie unica altezza
Si possono creare composizioni con pannelli boiserie fino ad altezza massima di 2910. Si possono accostare pannelli boiserie di diverse finiture. La boiserie (escluso specchio) si può attrezzare con i componenti del sistema giorno e notte Code.

Wall panelling in one piece
Compositions with wall panelling up to a maximum height of 114 1/2" are feasible. It is possible to combine wall panels in different finishes. The wall panelling (except mirror) can be accessorized with the components of the Code day and night system.

Boiserie sovrapposte
Si possono creare composizioni con pannelli boiserie sovrapposti. Si possono accostare, e sovrapporre, pannelli boiserie di diverse finiture. Il pannello inferiore dovrà avere un'altezza di serie, quello superiore un'altezza per differenza con quella totale. Eventuali riduzioni a misura devono essere applicate al pannello superiore rispettando l'altezza minima di 600.

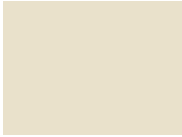

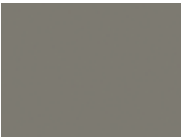

Superimposed wall panelling
Compositions with superimposed wall panelling are feasible. Wall panels in different finishes can be put near each other and can be superimposed. The lower panel must have a standard height; the upper panel has a height by difference with the total one. Any cuts to size must be applied to the upper panel respecting the minimum height of 23 1/2".

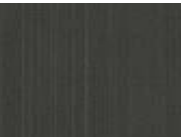

La boiserie in Inalco MDi® non può essere attrezzata con i contenitori living, le librerie e i pensili del sistema giorno Code.
Wall panelling in Inalco MDi® cannot be equipped with storage units living, bookcases and wall units of Code day system.

LINK PARTITION WALL SYSTEM
Design Studio Kairos

Link è un sistema interparete, sempre su misura, che prevede soluzioni lineari, angolari, a tre o quattro lati per l'organizzazione interna, la delimitazione o il collegamento degli ambienti. Composto da pannelli fissi, integrati con due sistemi di aperture: rototraslante, con anta singola e anta doppia, e apertura scorrevole. I pannelli, fissi o apribili, in battuta al muro, necessitano di profili di compensazione. Il binario, (a soffitto, incassato nel controsoffitto e, solo per apertura scorrevole, a parete), i profili a parete e pavimento sono dotati di regolazione telescopica per compensare le irregolarità delle superfici.

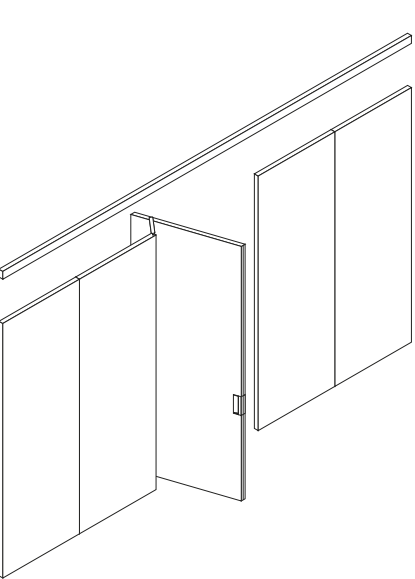

- 1 Pannello fisso
- 2 Binario

Link is a partition wall system, always customized, which features linear or corner solutions, with three or four sides, for internal organization, delimitation or connection of rooms. Composed of fixed panels, integrated with two opening systems: rototranslating, with single and double door, and sliding opening. The panels, fixed or with opening, against the wall, require compensation profiles. The track (fixed to the ceiling, built-in in the false ceiling and, only for sliding opening, wall mounted), the wall and floor profiles are arranged with telescopic adjustment to compensate imperfections of the surfaces.

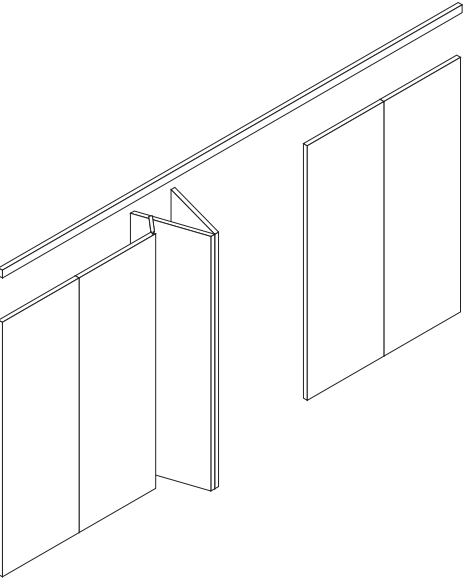

- 1 Fixed panel
- 2 Track

Apertura integrata rototraslante
Integrated rototranslating opening

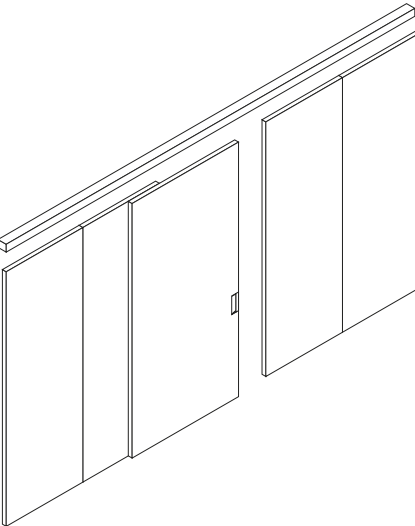

Rototraslante singola, binario monorotaia.
Single rototranslating door, with one-way track.

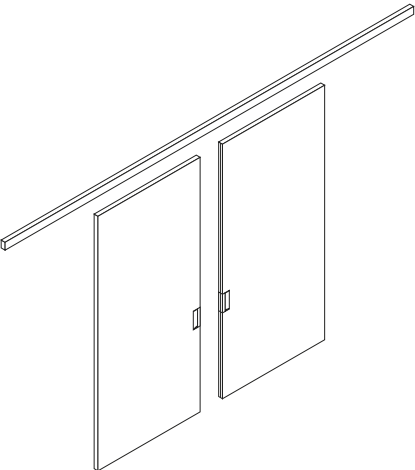

Rototraslante doppia, binario monorotaia.
Double rototranslating door, with one-way track.

Apertura integrata scorrevole
Integrated sliding opening

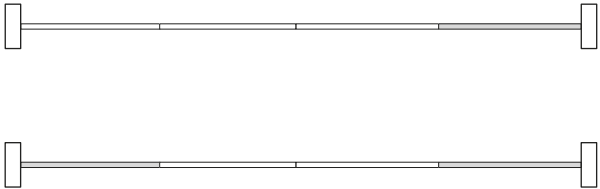

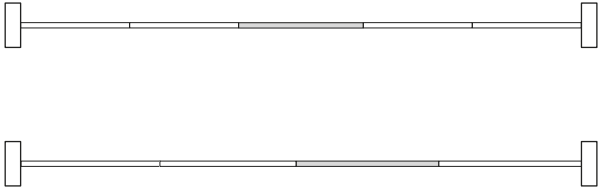

Scorrevole, binario birotaia.
Sliding door, two-ways track.

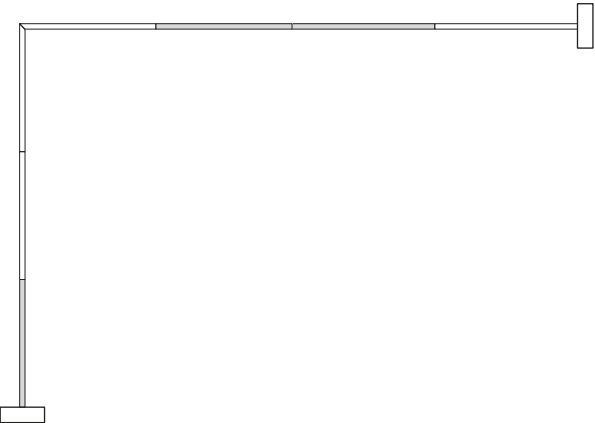

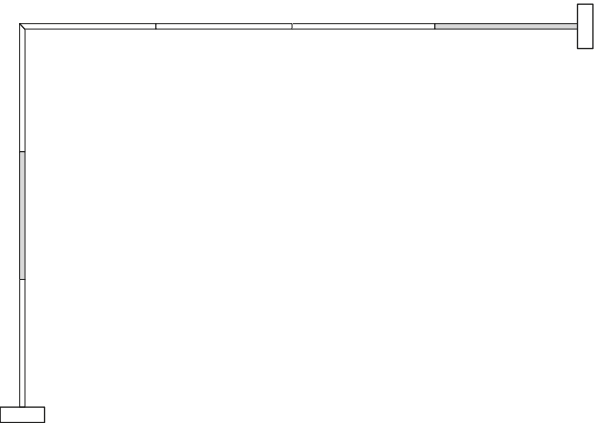

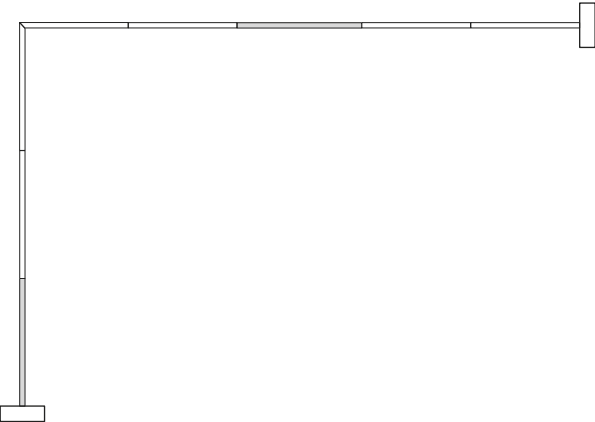

Scorrevole, binario monorotaia.
Sliding door, one-way track.
